HEATHER DOERSCHUK

Application Support | Training | Data Systems

Lakewood, OH | hdoerschuk@gmail.com | linkedin.com/in/heather-doerschuk

SUMMARY

Application support engineer with 7+ years of experience, including 6 on a B2B SaaS platform, focused on client platform design and training: turning requirements into builds and Figma prototypes, writing SOPs, training new engineers, and keeping data accurate with SQL. Now building Python ETL pipelines, Tableau dashboards, and pivot tables.

CORE SKILLS

Requirements Gathering • Figma Prototyping • Training & Documentation • SQL & Relational Databases • Data Models • Tableau Dashboards • Data Pipelines (Python) • REST APIs • Data Quality & Validation • Excel & Google Sheets (Pivot Tables) • Data Security & Permissions • Jira / Confluence / GitHub • AI Tools (Claude)

PROFESSIONAL EXPERIENCE

Senior Application Support Engineer | Within3 (Remote) *March 2022 – September 2026*

Application Support Engineer *August 2020 – February 2022*

- Took 200+ client platform builds from requirements through testing and go-live for top-20 pharma and biotech clients, writing functional specifications and pushing near-daily updates through Git and GitHub.
- Designed Figma prototypes of advisory boards and collaboratives for client demos.
- Authored and maintained 100+ SOPs and work instructions, and co-built a training program for new engineers.
- Served as the go-to problem solver for complex access, permissions, and platform issues, resolving an average of 70 Level 2 and Level 3 escalations per week and covering a 24/7 on-call rotation.
- Partnered with product and engineering on a self-service fix that cut one workflow's tickets from 35% to 5%.
- Protected data integrity by using SQL and the Rails console to fix client records without interrupting live advisory boards, and pulled custom reports for client success in Excel.
- Administered platform permissions and upheld security and compliance standards in a SOC-audited environment.

Digital Support Specialist | thunder::tech *January 2019 – August 2020*

Cleveland, OH

- Ran day-to-day help desk support for 60+ client websites and CMS platforms in Zendesk, and redesigned the support workflow with a new triage process that increased tickets resolved by 40%.
- Led client training on customized CMS platforms (Kentico, WordPress) and wrote the release documentation, success manuals, and learning plans that supported long-term adoption.
- Gathered and documented client requirements to scope feature development (PHP, .NET, MySQL), managed SSL certificates for all client sites, and supported QA testing and site launches.

Development Assistant | Beck Center for the Arts *April 2017 – August 2018*

Lakewood, OH

- Produced recurring reports and targeted lists from DonorPerfect that guided fundraising behind $1M+ raised.

PROJECTS

Lorcana Challenge Meta Analytics | Python, Tableau, REST API *2026 – Present*

- Built a Python ETL pipeline that pulls 3,500+ card records from the Lorcast REST API and joins them with results from 19 major tournaments and 73 top-cut decklists into Tableau-ready tables with a data quality report.
- Designed a six-dashboard Tableau suite with a data dictionary and built the first: a Top Cards dashboard.
- Built pivot tables and a bar chart on a 1,300+ row table comparing card types by year and top cards in Top 8 decks.

Lorcana Tournament Manager | Python, SQLite, Jira, GitHub *2026 – Present*

- Product-owned a tournament web app on an 8-table SQLite data model, built with AI-assisted development (Claude).

EDUCATION

Java Programming Certificate — Tech Elevator *September 2018 – December 2018*

Cleveland, OH | 14-week coding bootcamp: developing dynamic web-based software systems using Java

Bachelor of Arts — Otterbein University *September 2009 – May 2013*

Westerville, OH | Music and Business (Concentration in Management)
